PROFILE

Software Engineering Technology student at IPB University with an interest in Frontend Development and modern web technologies. Familiar with building responsive and interactive web applications using modern frontend frameworks, with a focus on creating engaging and user-friendly digital experiences. Interested in developing intuitive, visually consistent, and functional web interfaces through thoughtful UI design, responsive layouts, and user-centered development. Eager to continuously strengthen technical skills, explore new technologies, and apply software development knowledge to real-world projects while collaborating effectively with a team.

EDUCATION

IPB University – Bogor, Indonesia **2024 – Present**

Software Engineering Technology

EXPERIENCE

PT Angkasa Pura Indonesia (InJourney Airports) **July 2026**

Intern - Airport Operational Control Center (AOCC)

- Collected, organized, and analyzed passenger, flight, and cargo data during the Christmas and New Year holiday period to identify passenger traffic patterns and operational trends.
- Designed and developed an interactive and responsive dashboard to visualize passenger traffic trends, explore historical data, and present passenger forecasts for the following year.
- Developed a user-friendly dashboard interface with structured visual elements, clear information presentation, and intuitive navigation to make analytical insights accessible to non-technical users.

PT Gapura Angkasa **January 2026**

Intern - Office Administration & Ground Handling

- Supported daily administrative activities by organizing, processing, and maintaining office documents and records to ensure smooth office operations.
- Gained practical exposure to ground handling operations and airport service procedures, including aircraft ground operation workflows.
